

FREE FLOAT STEAM TRAP

MODEL JH7RL-X JH7RL-B/JH7RM-B

FREE FLOAT STEAM TRAP WITH THERMOSTATIC AIR VENTING

Benefits

A reliable and durable cast steel steam trap for use on medium-size process equipment. JH7RL-B/ JH7RM-B are also suitable for both superheated and high-pressure process equipment.

- Self-modulating free float provides continuous, smooth, low-velocity condensate discharge as process loads vary.
- Precision-ground float, constant water seal and threepoint seating design ensure a steam-tight seal, even under no-load conditions.
- Rugged float construction with up to 1500 or 2300 psig* hydraulic shock rating ensures excellent resistance to water hammer.
- JH7RL-X: Thermostatic capsule (X-element) with "fail open" feature vents air automatically at close-to-steam temperature.
- JH7RL-B/JH7RM-B: Thermostatic bimetal air vent valve vents air automatically for rapid startup.
- Built-in screen with large surface area ensures extended trouble-free operation.
- Easy, inline access to internal parts simplifies cleaning and reduces maintenance costs.

* Depending on orifice No.

Specifications

Discharge Capacity

• JH7RL-X

JH7RL-B/JH7RM-B

- 1. Line numbers within the graph are orifice numbers.
- 2. Differential pressure is the difference between the inlet and outlet pressure of the trap.
- 3. Capacities are based on continuous discharge of condensate 11°F below saturated temperature.
- 4. Recommended safety factor: at least 1.5.

CAUTION

DO NOT use this product under conditions that exceed maximum differential pressure, as condensate backup will occur!

DO NOT DISASSEMBLE OR REMOVE THIS PRODUCT WHILE IT IS UNDER PRESSURE.

Allow internal pressure of this product to equal atmospheric pressure and its surface to cool to room temperature before disassembling or removing. Failure to do so could cause burns or other injury. READ INSTRUCTION MANUAL CAREFULLY.
