

- **Industry-specific design**
  - suitable for all applications found in the water and waste water industries
- **Widest flow range, highest accuracy**
  - diameters from 15mm to 2200mm (0.5 to 84 in.)
- **Submersible sensor**
  - suitable for flooded chambers and pits
- **Buriable sensor**
  - eliminates chambers and ensures fast, low-cost installation
- **Hazardous area approvals**
  - FM, CSA, ATEX
  - ideal for waste water treatment works
- **Built-in earthing (grounding) electrode**
  - eliminates the need for earthing (grounding) flanges
- **2-year warranty as standard**
  - high-quality product guarantees reliable maintenance-free operation
- **CalMaster compatible**
  - in situ verification of flow meter calibration
- **Remote Communications**
  - including Profibus DP v0

**MagMaster – bringing unsurpassed flowmetering performance to the Water and Waste Water industries**

## Setting the Standard

Designed specifically to target the diverse applications found in the supply and treatment of both potable and waste water, MagMaster sets new levels of accuracy, reliability and low cost of ownership.

MagMaster's ground-breaking design guarantees long-term calibration stability, coupled with the wide range of sizes, 15 to 2600mm (0.5 to 102 in.), choice of lining and electrode material quickly established MagMaster as the de facto industry standard electromagnetic flow meter.

## Class-leading Flow Performance

The combination of sensors with ultra-linear magnetics, proven technology, signal processing and sensor drive results in unsurpassed accuracy and an operable flow range of 1500:1. MagMaster's class-leading performance ensures reliable and accurate measurement over the widely varying flow rates, including minimal night flows, which occur in typical water and waste water systems.

## Assured Quality

MagMaster is designed and manufactured in accordance with international quality procedures (ISO 9001) and all flowmeters are calibrated on nationally-traceable calibration rigs to provide the end user with complete assurance of both quality and performance of the meter.

## Calibration Verification

CalMaster is the world's first in situ calibration verification system. The system allows the calibration of MagMaster electromagnetic flow meters to be verified without the need for 'wet calibration'. The complex series of tests automatically performed by CalMaster is completed and a certificate produced without costly excavation of the sensor or disruption to the water supply. A complete solution to the regulatory requirement for routine verification and traceability of electromagnetic flow meters.

For further information on CalMaster refer to the brochure PB/CALMASTER

ABB operated national and internationally accredited flow calibration facilities in the UK, USA, Australia, Germany and India.

## Electronic Display Unit

- Comprehensive display
- Forward, reverse and net totals
- 4 digital outputs: forward pulse, reverse pulse, alarm 1 and alarm 2
- 2 analog outputs (output 2 optional)
- Communications: serial data (RS232), HART and Profibus DP v0

MagMaster is available with integral or remote transmitters, configuration is achieved either with a configurator or via the optional integral keypad. The software features multi-level password protection to prevent unauthorized configuration changes. In the 2-line display only variant, display data can only be changed using a magnetic wand, no operational parameters can be changed without the use of a configurator and appropriate passwords.

Wallmount Version

## Programming Options

- Local hand-held configurator (for example Psion Workabout)
- Integral keypad
- HART
- Personal computer

## Easy, Low-cost Installation

MagMaster sensors' rugged and robust construction ensure a long, maintenance-free life under the arduous conditions experienced in the water and waste water industry. The sensors are fully submersible, meeting the requirements of IP68 (NEMA6P) enabling installation in flooded chambers or metering pits.

MagMaster sensors in all sizes are buriable. Installation merely involves excavating to the underground pipe, fitting the sensor, cabling back to the transmitter and then backfilling the hole. No metering chambers or pits are required so the installation is simple, fast and low cost.

*Underground Installation of MagMaster*

## International Approvals

Alternative versions of MagMaster are available for general locations with FM Approval/CSA Certification and for Hazardous Area locations to ATEX, FM and CSA Standards. A brief summary of these Hazardous Area versions is given below, covering the safety designation inside the pipe. No external safety barriers are required.

SENSOR	INSIDE PIPE	TRANSMITTER LOCATION
FM & CSA HAZARDOUS AREA APPROVAL – CLASS 1, DIV. 2, GROUPS A B C D		
FM APPROVED	INTRINSICALLY SAFE ELECTRODES	REMOTE ONLY IN HAZARDOUS AREA
CSA CERTIFIED		REMOTE ONLY IN HAZARDOUS AREA
CSA CERTIFIED	NON INCENDIVE	INTEGRAL AND REMOTE IN HAZARDOUS AREA
ATEX – II 2 (I) G EEx e m ia IIC T4		
ZONE 1	ZONE 0	REMOTE TRANSMITTER IN SAFE AREA

## Specification

#### Accuracy (under forward flow reference conditions)

## Wetted Material

### Lining

Suitable for potable water and waste water  
(all materials UKWFBS listed)  
Contact factory for non-standard materials

### Electrodes

Stainless steel 316  
Contact factory for non-standard materials

### Flanges

Carbon steel

### Pressure limitations

≤600mm as flange rating  
≥700mm 6, 10 or 16 bar

### Environmental protection

IP68 (NEMA6P)  
Buriable to 5m (16 ft) depth

### Pressure equipment directive 97/23/EC

This product is applicable in networks for the supply, distribution and discharge of water and associated equipment and is therefore exempt.

### Conductivity

≥5μS/cm

### End connections

PN6 ANSI B16.5 Class 150  
PN10 ANSI/AWWA C207 Class B and D  
PN16 AS2129 Table C or BS10/AS2129 Table D and E

## Electronic Display Unit

### Mounting

Integral with sensor  
OR  
Remote up to 100m (325 ft)  
Longer lengths available on request

### Housing

IP65 (NEMA4)  
Glass-loaded polypropylene, polycarbonate window ULVO rated

### Electrical connections

20mm glands, or accepts  
1/2 in. NPT connections

### Sensor cable

ABB cable supplied as standard  
Armored version available on request

## Power supply\*

Voltage Type	Voltage Range (V) Absolute rating	Frequency (Hz)	VA
AC	85 to 265	47 to 440	<20
DC	11 to 40	–	<20

\*Power supply fully isolated

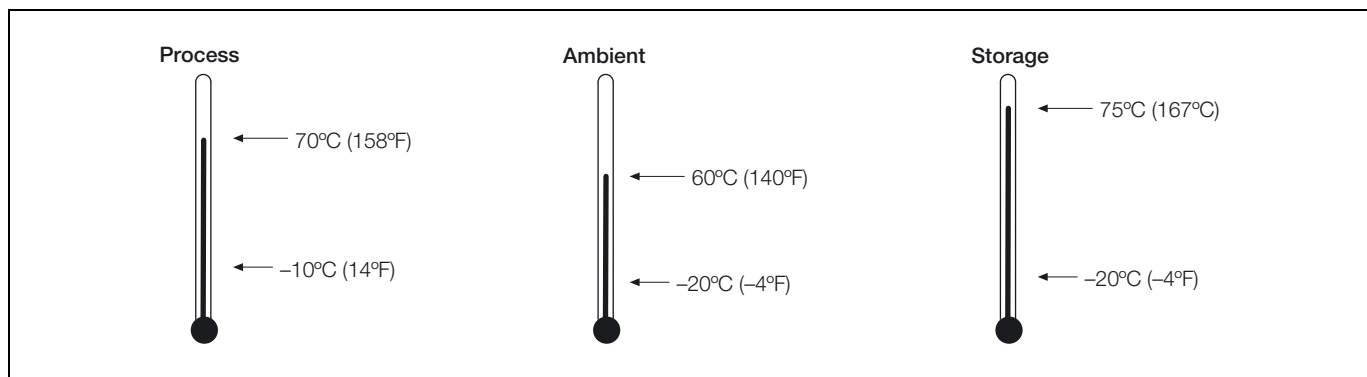

## Liquid Sensing

Drives output to zero with an empty pipe

## Languages

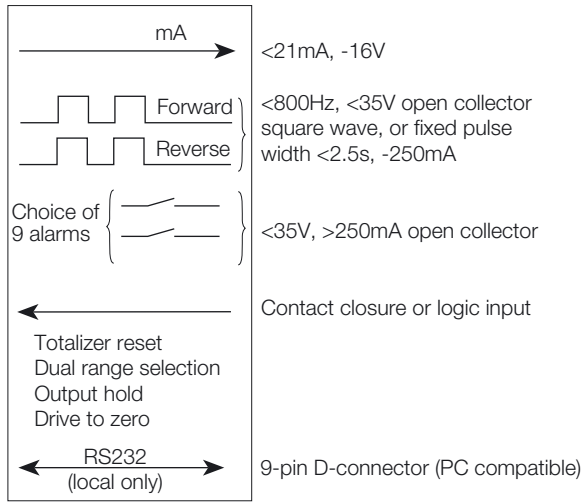

Operation in English, French, German, Spanish, Italian, Dutch plus others on application

## Temperature Ranges

### Output/Inputs

Common

Optional (For blind & 2-line display units)

Optional (For keypad units)

Galvanic isolation to 50V DC between analog pulse/alarm and earth/ground

### Mounting

### Pipe Connections
